

## Looking for Volunteers

# iCare New Free Program for Caregivers

We are seeking caregivers of individuals with Alzheimer's Disease or other dementia, to participate in our study. Free DVD and resources on dementia will be provided. We will ask you to tell your opinions on our materials. Our goal is to help you to alleviate stress and improve quality of life.

This research program from Photozig and Stanford University will be offered free of charge to qualified caregivers. It is funded by the National Institute on Aging (part of the National Institutes of Health).

Compensation will also be provided to qualified participants. A free online course (developed by this project) will be available for participants/families at the end of the study.

Web-based self learning (no face-to-face meetings, appointments, etc). You can live anywhere in US. If this program might be right for a friend or relative, please forward this to them.

Alzheimer's Disease & Dementia

DVD and resources

Free Program

Monetary Compensation

No Cost to participate

Toll-free (855) 955-CARE
